Project Description

The Clermont County Transportation Improvement District, in cooperation with the City of Milford, the Clermont County Engineer's Office, Miami Township, Union Township, and the Ohio Department of Transportation, is continuing with the study of the US 50/SR 131 and Milford Parkway/Chamber Drive intersections and the surrounding areas for possible economic, environmental, and transportation improvements.

Project History

A public open house meeting was held on November 18, 2009 to gather public input on existing issues, resources, and features relative to the project study area. Since the first public open house meeting, the project team has completed a market analysis study, environmental overview, and traffic analysis for the study area. The results of the studies are currently being compiled in a Planning Study Report.

Project Goals

The following initial project goals have been established for the US 50/SR 131 and Milford Parkway/Chamber Drive Improvements project:

- Evaluate the economic conditions of the area, identify areas of potential growth, and assist in the determination of anticipated traffic volumes in the area.
- Identify environmental features and potential mitigation/green infrastructure opportunities.

- Improve the study area access, safety, and travel efficiency for both current traffic volumes and potential growth in the study area.
- Develop a transportation plan for future community, economic, and redevelopment opportunities.

Please review the information presented at the second public open house meeting and provide input on the following:

- Purpose and Need for Improvements
- Environmental and Existing Conditions Analysis for the Project Area
- Market Analysis Study for the Project Area
- Recommended Priority Near-Term Improvements
- Other Potential Improvements (for Additional Consideration)
- Preliminary Concept Plan
- Implementation Strategy and Phasing

Next Step

After the second public open house meeting, the Planning Study Report will be finalized and preliminary engineering and environmental clearance will begin for the priority transportation improvement project(s) identified for near-term implementation. Please don't miss this opportunity to let us know what you think.
